ANNUAL INDEX

Addison, J. A., S. D. Howison, and J. R. King. *Ray methods for free boundary problems*, 41

Alexander, James C. *See* Auchmuty, Giles

Altay, Gülay, and M. Cengiz Dökmeci. *Free vibrations of a polar body at elastic range*, 711

Athanasiadis, C., V. Sevroglou, and I. G. Stratis. *Scattering relations for point-generated dyadic fields in two-dimensional linear elasticity*, 695

Auchmuty, Giles, and James C. Alexander. *Finite-energy solutions of mixed 3d div-curl systems*, 335

Babu, V. Ramesh. *See* Vajravelu, K.

Banks, H. T., and N. L. Gibson. *Electromagnetic inverse problems involving distributions of dielectric mechanisms and parameters*, 749

Berti, Valeria, and Stefania Gatti. *Parabolic-hyperbolic time-dependent Ginzburg-Landau-Maxwell equations*, 617

Bonfoh, Ahmed. *Finite-dimensional attractor for the viscous Cahn-Hilliard equation in an unbounded domain*, 93

Boukrouche, Mahdi, and Ionel Ciuperca. *Asymptotic behaviour of solutions of lubrication problem in a thin domain with a rough boundary and Tresca fluid-solid interface law*, 561

Cannon, J. R. *See* Vajravelu, K.

Cao, Daomin, Ezzat S. Noussair, and Shusen Yan. *Multiplicity of asymmetric solutions for nonlinear elliptic problems*, 463

Charalambakis, Nicolas, and François Murat. *Homogenization of stratified thermoviscoplastic materials*, 359

Cheng, Sui Sun, and Yi-zhong Lin. *The exact region of oscillation for a first order neutral differential equation with delays*, 433

Choudhury, Bejoy K. *Transient temperature and elastic response of a space-based mirror in the radiation-conduction environment*, 201

Ciuperca, Ionel. *See* Boukrouche, Mahdi

Dhaliwal, R. S. *See* Singh, B. M.

Dökmeci, M. Cengiz. *See* Altay, Gülay

Duc, Luu Hoang, Achim Ilchmann, Stefan Siegmund, and Peter Taraba. *On stability of linear time-varying second-order differential equations*, 137

Ferreira, Chelo, and José L. López. *The Lambert transform for small and large values of the transformation parameter*, 515

Gatti, Stefania. *See* Berti, Valeria

Gibson, N. L. *See* Banks, H. T.

Grinfeld, Pavel, and Jack Wisdom. *A way to compute the gravitational potential for near-spherical geometries*, 229

———. *Total gravitational energy of a slightly ellipsoidal trilayer planet*, 271

Guo, Jong-Shenq, and Bei Hu. *On a two-point free boundary problem*, 413

Howison, S. D. *See* Addison, J. A.

Hu, Bei. *See* Guo, Jong-Shenq

Ilchmann, Achim. *See* Duc, Luu Hoang

Jiang, Jifa, and Xing Liang. *Competitive systems with migration and the Poincaré-Bendixson theorem for a 4-dimensional case*, 483

Kimoto, Kyoko. *See* Sugie, Jitsuro

King, J. R. *See* Addison, J. A.

Klein, Olaf, Fabio Luterotti, and Riccarda Rossi. *Existence and asymptotic analysis of a phase field model for supercooling*, 291

Knops, R. J. *On local uniqueness in nonlinear elastodynamics*, 321

Krutitskii, P. A., and A. I. Sgibnev. *Mixed problem for the Laplace equation outside cuts in a plane with setting Dirichlet and skew derivative conditions on different sides of the cuts*, 105

Kuznetsov, Sergey V. *SH-waves in laminated plates*, 153

Lee, Chung-min, and Jacob Rubinstein. *Elliptic equations with diffusion coefficient vanishing at the boundary: Theoretical and computational aspects*, 735

Liang, Xing. *See* Jiang, Jifa

Lin, Yi-zhong. *See* Cheng, Sui Sun

López, José L. *See* Ferreira, Chelo

López, José Luis, and Juanjo Nieto. *Global solutions of the mean–field, very high temperature Caldeira–Leggett master equation*, 189

Luterotti, Fabio. *See* Klein, Olaf
Malinen, Jarmo, Olof J. Staffans, and George Weiss. *When is a linear system conservative?*, 61
Miklavčič, M., and C. Y. Wang. *Viscous flow due to a shrinking sheet*, 283
Murat, François. *See* Charalambakis, Nicolas
Nieto, Juanjo. *See* López, José Luis
Noussair, Ezzat S. *See* Cao, Daomin
Novruzi, Arian. *Existence of optimal shape for a system of conservation laws in a free air-porous domain*, 641
Pata, Vittorino. *Exponential stability in linear viscoelasticity*, 499
Pedregal, Pablo, and Francisco Periago. *Some remarks on homogenization and exact boundary controllability for the one-dimensional wave equation*, 529
Periago, Francisco. *See* Pedregal, Pablo
Quintanilla, Ramon, and Giuseppe Saccomandi. *Spatial behavior for a fourth-order dispersive equation*, 547
Ranger, K. B. *Parametrization of the two and three-dimensional motion of a viscous incompressible liquid*, 401
Rokne, J. *See* Singh, B. M.
Rollins, D. *See* Vajravelu, K.
Rossi, Riccarda. *See* Klein, Olaf
Rubinstein, Jacob. *See* Lee, Chung-min
Saccomandi, Giuseppe. *See* Quintanilla, Ramon
Sevroglou, V. *See* Athanasiadis, C.
Sgibnev, A. I. *See* Krutitskii, P. A.
Siegmund, Stefan. *See* Duc, Luu Hoang
Singh, B. M., J. Rokne, and R. S. Dhaliwal. *Multiple bent cracks in an infinite orthotropic plate under an anti-plane shear stress*, 253
Sreenadh, S. *See* Vajravelu, K.
Staffans, Olof J. *See* Malinen, Jarmo
Stratis, I. G. *See* Athanasiadis, C.
Sugie, Jitsuro, and Kyoko Kimoto. *Homoclinic orbits in predator-prey systems with a nonsmooth prey growth rate*, 447
Taraba, Peter. *See* Duc, Luu Hoang
Tarantino, Angelo Marcello. *Asymmetric equilibrium configurations of hyperelastic cylindrical bodies under symmetric dead loads*, 605
Ulitko, Andrei F. *See* Zabarankin, Michael
Vajravelu, K., J. R. Cannon, and D. Rollins. *Diffusion of chemically reactive species in a porous medium*, 17
Vajravelu, K., S. Sreenadh, and V. Ramesh Babu. *Peristaltic transport of a Herschel-Bulkley fluid in contact with a Newtonian fluid*, 593
Wang, C. Y. *See* Miklavčič, M.
Wang, Ya-Guang. *See* Yang, Lin
Weiss, George. *See* Malinen, Jarmo
Wisdom, Jack. *See* Grinfeld, Pavel
Wu, Hao, and Songmu Zheng. *Convergence to equilibrium for the damped semilinear wave equation with critical exponent and dissipative boundary condition*, 167
Yan, Shusen. *See* Cao, Daomin
Yang, Lin, and Ya-Guang Wang. *$L^p - L^q$ decay estimates for the Cauchy problem of linear thermoelastic systems with second sound in one space variable*, 1
Yu, Hongjun. *The exponential decay of global solutions to the generalized Landau equation near Maxwellians*, 29
Zabarankin, Michael, and Andrei F. Ulitko. *Hilbert formulas for r-analytic functions and the Stokes flow about a biconvex lens*, 663
Zheng, Songmu. *See* Wu, Hao
